

PC DIRECT

CATALOGUE
EIGHTH EDITION

CORPORATE PROFILE

*"To build high quality, industry-standard personal computers
and to provide our customers with superior service and support."*

When PC Direct opened its doors in early 1989 that was the goal we set ourselves, and as we enter our fifth year it remains our prime objective.

PC Direct New Zealand is a key part of the international PC Direct group whose combined turnover exceeded \$80 million in the 1992/93 fiscal year. We have a majority New Zealand shareholding which allows us a more responsive, local market driven management style, while maintaining the strengths of an international corporation. Our resources in manufacturing, engineering and finance give us the ability to offer products that are technically superior and consistent in design and manufacture. PC Direct is geared towards giving our customers what they want, when they want it, backed by the very best service and support. This attitude has become widely known throughout New Zealand as the "Direct Approach".

The security and peace of mind offered by an international organisation combined with an entrepreneurial and customer driven style of a distinctly New Zealand company has seen PC Direct become the first choice for many of New Zealand's corporations, universities and businesses.

CONSIDER THE COMPUTER YOU ARE ABOUT TO PURCHASE

People everywhere increasingly rely on technology to improve efficiency, enhance presentations, aid communication and facilitate learning. It stands to reason that they must rely on the company that provides that technology even more. Consumers undertake more research when purchasing a computer than almost any other item. The rapid changes in technology can make the purchasing decision, not only for today's needs but tomorrow's as well, a difficult decision – one worthy of careful consideration.

Consider the qualities you seek in the company you will purchase from. The relationship you establish with this company is as important as the computer you purchase. Your computer will give you many years of service and so should the company you purchase it from. You should look for a company with people that are knowledgeable, well trained, and easily accessible when you need them. A company that probably wrote the book on service and support, with a commitment to customer satisfaction that is second to none.

The computer industry is changing faster than ever before. Amidst all of this change is an even greater need for a company that is consistent, stable and strong. One company stands out in the crowded computer market place. The company with a reputation for quality products backed up by the very best in service and support...

SOFTWARE SAVINGS

All the PC Direct computers in this catalogue are covered by our comprehensive 3 year return to base parts and labour warranty. In addition, the 486vp and the 486ep come with the convenience of 12 months nationwide on-site service.

PC Direct is the only company to have twice won the PC World "Best Hardware Service and Support" award for our exclusive Lifeguard Customer Support. We have recently almost doubled the size of our support team to provide our customers with even better service in the future. Other companies talk about service and support – PC Direct delivers.

PC Direct is a Microsoft Accredited Solution Provider. This requires our technical staff to pass Microsoft product support examinations and our company to meet other strict guidelines. We also comply with Novell's Authorised Reseller and Certified NetWare Engineer requirements. The training our staff undergo is extensive, both technically and in customer care. PC Direct staff are some of the best professionals in the business.

0800 655 343 From anywhere in NZ you can call us toll free for product advice, after sales support or to place your order.

For 24 hour access to the latest technical information on your PC Direct computer, dial into this free service. This is our own in-house technical bulletin board with a continually updated collection of hints, technical files, advice and software.
BBS # 0-9-303 2340 (multi-line)

If you are not convinced your new PC Direct computer is as great as we say it is, you have 7 days to return it for a full refund.

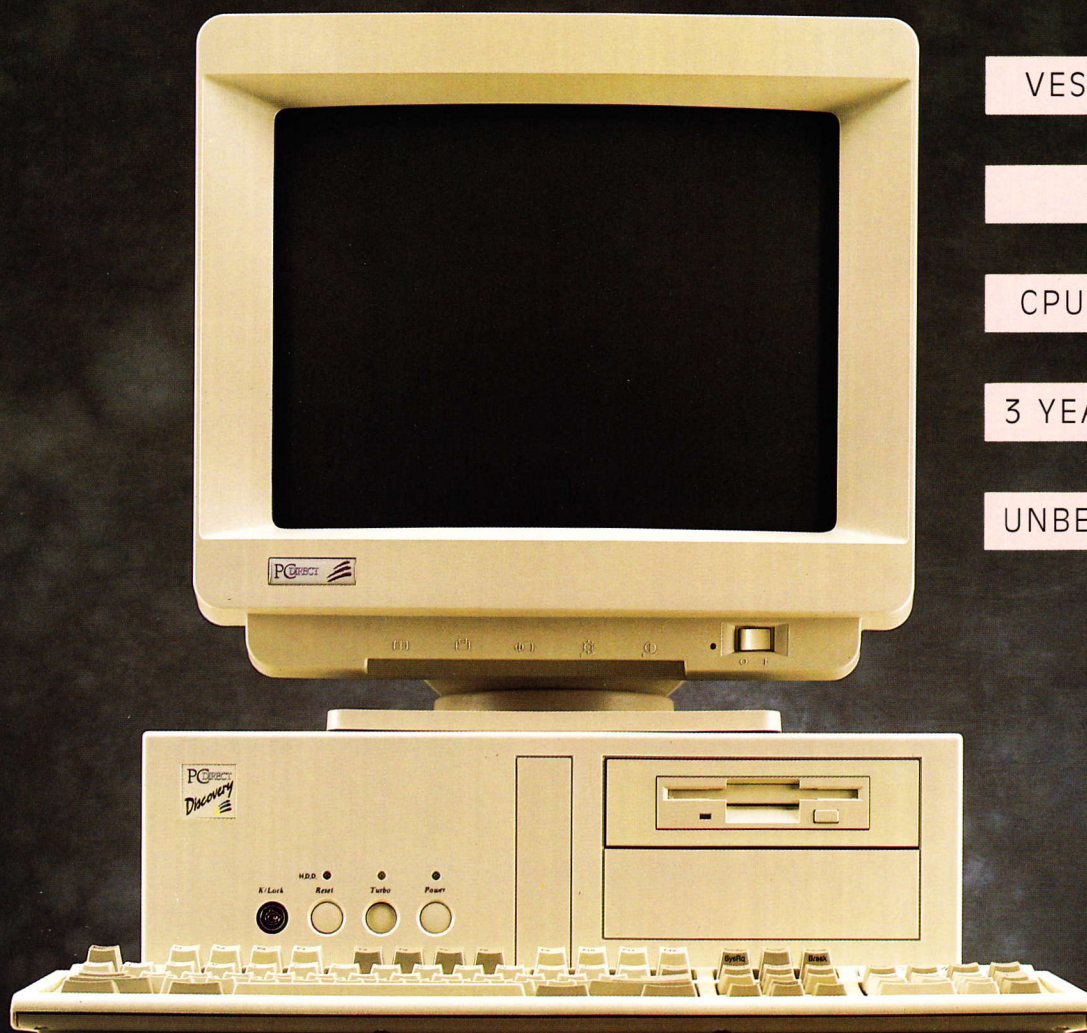

We offer hire purchase and lease to buy options to suit both the home and business buyer. Interest is calculated at competitive business finance rates. To discuss these options please call one of our sales team. Standard credit criteria apply.

We keep you in touch with PC Directions, our regular customer newsletter. Filled with industry news, product releases, special offers and technical hints.

This is a sophisticated in-house program that keeps all your information at our fingertips. From the specifications on every PC you have purchased, right down to hard drive type and amount of memory, to upgrades and service history. It helps us to provide prompt and professional service.

Fantastic software savings with our PC Direct Windows Systems. These systems include Microsoft Windows, mouse and your choice of a Microsoft application. Choose either Word, Excel, PowerPoint or Access. All software is fully installed before delivery. (See page 14).

UNBEATABLE VALUE

PC DIRECT DISCOVERY

The PC Direct Discovery is a fully featured PC which represents unbeatable value for money. An ideal system for home, small business and educational users.

BASE UNIT STANDARD FEATURES:

- 4MB 70nS RAM (expandable to 32MB on M/B)
- AMI BIOS with shadow RAM
- Second level 128K cache
- 14" Super VGA 1420 low emission colour monitor
- Local bus Super VGA card with 1MB RAM
- 1.44MB 3.5" floppy disk drive
- Co-processor socket
- CPU upgradable to 486DX or 486DX2
- Parallel printer port, 2 serial ports, game port
- 6 x 16-bit expansion slots with 2 x VESA local bus extensions
- Desktop metal case with mounting bays for 2 x 5.25" & 2 x 3.5" devices
- 200 Watt power supply with front panel ON/OFF switch
- Case dimensions 153mm (H) x 392mm (W) x 412mm (D)
- MS-DOS & manual
- PC Direct Main Menu software
- Lifeguard Customer Support; 3 year parts & labour warranty, toll free phone support

SYSTEM OPTIONS:

PC DIRECT 486vp

THE NEW STANDARD IN POWER-USER COMPUTING

Now you can buy a power system that offers the absolute maximum in performance without paying a premium price.

By eliminating system bottlenecks and combining high performance components into a complete Windows-tuned system, the PC Direct 486vp simply leaves the competition standing. The performance driven design of the PC Direct 486vp sees the 32-bit VESA local bus teamed up with an all new lightning fast graphics accelerator and the latest in local bus hard drive technology.

In both benchmark and real world test results the PC Direct 486vp sets the new performance standard in 486 computing.

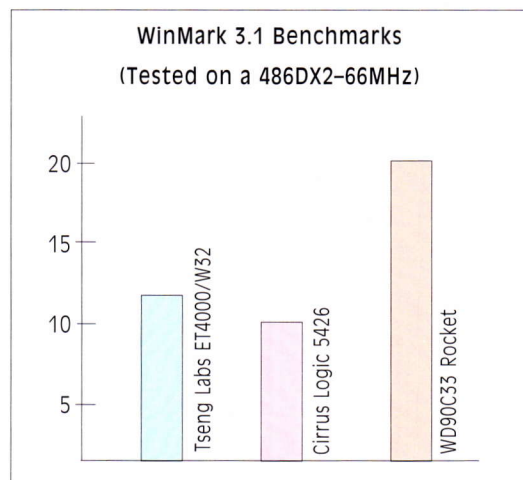

WESTERN DIGITAL "ROCKET"

WINDOWS WD90C33 GRAPHICS ACCELERATOR

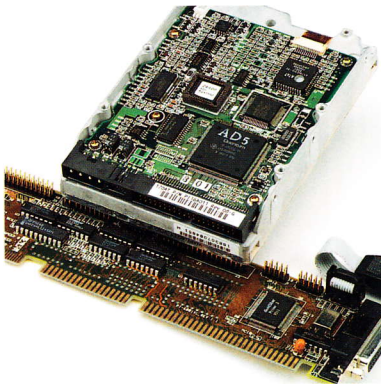

Powering through screen intensive Windows applications on the PC Direct 486vp is the all new WD90C33 "Rocket" Windows graphics accelerator from

Western Digital. This second generation Windows graphics accelerator leaves the competitions first generation accelerators standing. Compare the "Rockets" WinMark of over 20 million! That's twice as fast as some of the offerings from others.

Have you got time to wait around for screen updates?

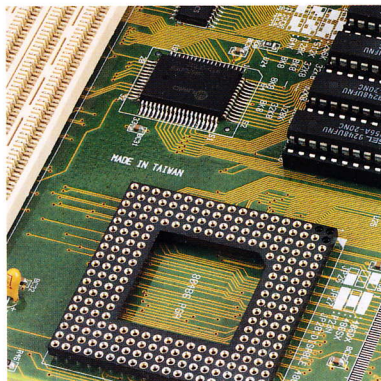

32-BIT LOCAL BUS HARD DRIVE

Local bus gets about as far as the video adapter on most systems - but the PC Direct 486vp doesn't stop there. We have opened up the hard drive data path to the full 32-bit 33MHz VESA local bus for maximum data throughput!

Most of the competition's systems are still getting their data off the 16-bit ISA bus at 8MHz. If you would rather be manipulating your data than waiting around for your hard disk to get it, then put local bus hard drive at the top of your list.

FULLY UPGRADABLE

The standard PC Direct 486vp system configurations on the following pages pack enough punch for most power-users. However the 486vp has upgrade paths built-in for future upgrade requirements.

CPU UPGRADABLE

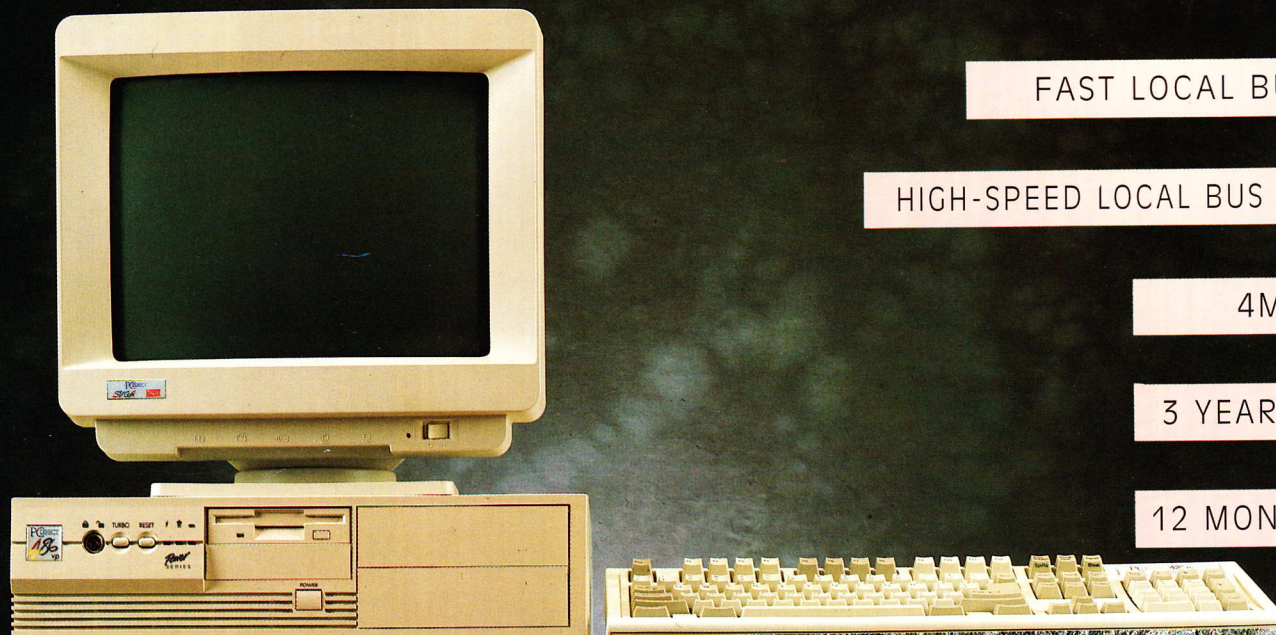

The PC Direct 486vp can be fitted with 486SX/486DX/486DX2 or Pentium OverDrive (P24T) CPUs. Just plug in your choice of chip! The 486vp has a fast 256K 20ns secondary RAM cache which will keep any of these CPUs fed with data at full speed.

RAM UPGRADABLE

Upgrade from the standard 4MB all the way up to a massive 64MB on the motherboard! The 486vp accepts both the standard 30-pin SIMMs and the newer 72-pin SIMMs. Keep that in mind if you think you might be expanding your RAM in the future.

EXPANDABLE CASES

The PC Direct 486vp comes in three choices of case styles. All cases provide plenty of room for future upgrade options. See page 16 for more details.

FAST LOCAL BUS VIDEO

BUYERS GUIDE

CHOOSING THE PC THAT IS RIGHT FOR YOU

With hundreds of different brands of IBM compatible computers available and a bewildering language of computer jargon, choosing the right PC is a challenge to say the least. This buyers guide is written to try and explain some of the computer jargon and technology so that you can make an educated buying decision.

HARDWARE CONSIDERATIONS

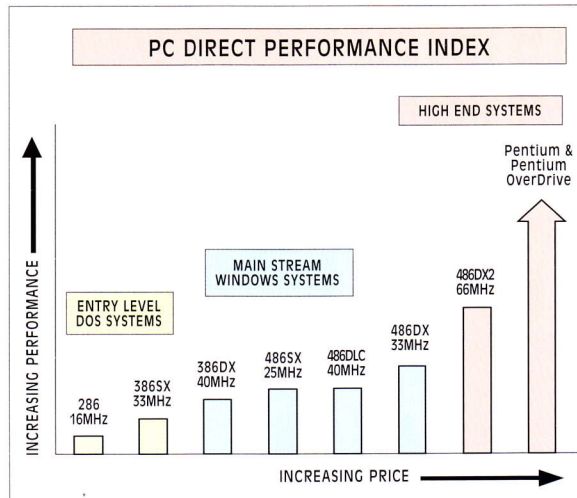

The four main hardware considerations when buying a PC are;

- CPU type
- Amount of RAM (memory)
- Hard drive size (storage)
- Display type (screen/video)

CPU TYPE

The CPU (Central Processing Unit) is the brain of the computer. Because the CPU carries out the calculations and commands of the computer it plays a large part in determining the overall performance and power of the computer system. There are a large number of different types of CPUs used in PCs, however they can be sorted into three main groups;

- Entry level DOS systems
- Main stream Windows systems
- High end systems

The PC Direct Performance Index gives a clearer idea of overall performance of the most popular CPUs on the market. Although different CPUs run at different speeds and have different designs, the PC Direct Performance Index cuts through all the landmark and benchtest results to show you typical "real world" performance.

The 286/386SX CPUs are really only suitable for systems running DOS. With the popularity (and performance demands) of Microsoft Windows the 286/386SX CPUs are becoming obsolete.

CPUs FOR WINDOWS

The four main stream Windows systems CPUs are the most popular and represent good CPU choices for running Microsoft Windows. The 486SX-25 and 486DLC-40 offer similar overall performance. The 386DX-40 represents the price entry point to the main stream segment, and the 486DX-33 is in the high performance area.

Right at the top end of the performance scale is the 486DX2-66 and Pentium CPUs. These CPUs represent the current leading edge in PC performance and are mainly for fileserver or "power system" type applications.

RAM

The minimum recommended RAM size for running Microsoft Windows is 4MB (Mega Bytes).

Some systems are advertised with 2MB (or even just 1MB) of RAM - don't even think about trying to run Windows on them! You definitely need to purchase a system with 4MB of RAM for running Microsoft Windows and Windows applications.

If you are looking to run a number of large Windows applications simultaneously then consider a system with 8MB of RAM. Probably the best place to invest extra money for more performance in a Windows system is in upgrading the RAM from 4MB to 8MB.

HARD DRIVE

Today's Windows applications are very demanding on hard drive storage requirements. Typical applications can use up to 20MB of hard drive storage each when fully installed! For this reason a 170MB hard drive has become the ideal recommended size. Drive sizes larger than 170MB or 240MB are only normally required for "power systems" or file servers.

DISPLAY TYPE

For fast video look for a system with a local bus Super VGA card and 1MB video RAM. Standard home/small business systems should have a display card with a WinMark speed around 10 million or higher. (WinMark is a performance test program which measures the speed of the video display card when running Microsoft Windows).

MONITORS

The most popular monitor size is 14". This size monitor is ideal for running Windows in 640 x 480 and 800 x 600 resolution. For desktop publishing or CAD applications (1024 x 768) a 15" or 17" monitor should be considered.

Trying to run 1024 x 768 mode on a 14" monitor will probably see you sitting 10cm in front of the

screen struggling to read the text! Monitors should also be adjustable so that the picture can be displayed "full screen", i.e. right to the edges of the tube. For systems with typical use around 2-3 hours per day look for a low-emission monitor. Systems for office or all-day use should have a fully approved MPRII low radiation monitor.

Monitors shown with actual screen display

14" SUPER VGA 1420
COLOUR MONITOR — \$499

- 800 x 600 non-interlaced & flicker-free

QUALITY CONSISTENCY

All PC Direct systems must pass an intensive six stage quality control procedure before they are delivered to the end user. These tests are amongst the toughest in the industry and ensure that PC Direct computers are delivered ready-to-go first time.

PRODUCT RANGE

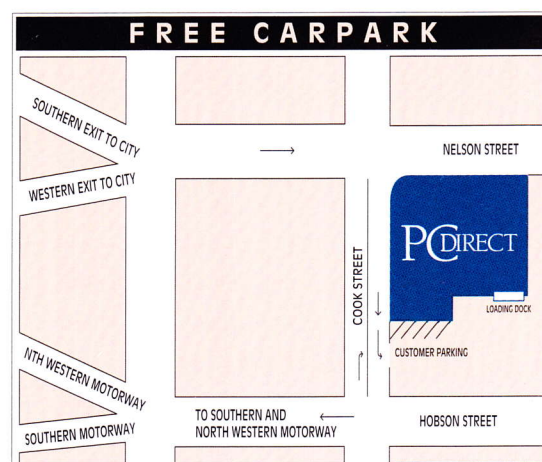

PC Direct has a policy of only selling and supporting the very best products in their class - so you won't find us selling every different brand and model. Before a product can become part of the select PC Direct range it undergoes a rigorous evaluation and testing program. Only the products that can survive these tests and stand out from the crowd are considered by PC Direct. At PC Direct we do not sell products that we don't use ourselves. We endeavour to carry all the products in this catalogue ex-stock at all times. Most importantly, because we have chosen only the very best products and we use them ourselves, we can offer a very high level of service and support. Only by these stringent rules can we be confident in supplying you the quality, service and support that PC Direct is renowned for.

7 DAY MONEY-BACK GUARANTEE

We know you are going to be very happy with your new PC Direct computer. However, if you are not completely satisfied you can return your computer for a full refund. Just call your customer service rep for a return number and send the system back in its complete packaging and original condition. Please note that due to the licencing requirements of software we are not able to offer this service on opened/installed software products. This service is available on PC Direct computer systems only. (Note: a re-stocking fee may apply for goods not in original condition, or for any consumables used).

WE ARE EASY TO FIND

PC Direct is easy to get to with our central location just one minute from the Northern, Southern and Western motorways. Parking is no problem with our free customer car park off Cook Street right outside PC Direct. Call in and see our large showroom with all the PC Direct systems and products in this catalogue on display. Our friendly sales consultants can help with any questions you may have.

ARE YOU ON OUR MAILING LIST?

If you didn't receive this catalogue through the mail in a personalised envelope then you are not on our mailing list. If you or a friend would like to receive our regular catalogue and newsletters then please fill in the coupon and send it to us.

MULTIMEDIA

SOUNDBLASTER PRO \$299

Bring your PC to life with the SoundBlaster Pro sound card. This card is supported by Windows and most games.

- Adlib and SoundBlaster compatible
- CD-ROM interface
- Supported by most popular software
- Includes Lemmings and Indianapolis 500
- Speakers included
- Windows drivers included

SOUNDBLASTER 16 \$449

CD quality sound reproduction has arrived for the PC from the makers of the most popular sound standard.

- Adlib and SoundBlaster compatible
- Up to 44.1kHz sampling rate in stereo (CD quality)
- CD-ROM interface
- Microphone
- Amplified speakers
- Windows drivers included

SOUNDBLASTER PRO DISCOVERY PACK \$799

The ideal start to the world of multimedia with CD-ROM titles suitable for all age groups, while offering the performance of a double speed drive.

- SoundBlaster Pro sound card
- Panasonic double speed CD-ROM drive
- Four CD titles included
- Speakers included

SOUNDBLASTER CD16 PERFORMANCE PACK \$1099

Combining the SoundBlaster 16 and double speed Panasonic CD-ROM drive into a MPC II compliant multimedia package.

- SoundBlaster 16 sound card
- Panasonic double speed CD-ROM drive
- Five CD titles included
- Microphone
- Amplified speakers

PANASONIC DOUBLE SPEED CD-ROM DRIVE SPECIFICATIONS

(As supplied with Discovery & CD16 Pack)

Photo CD multisession session and XA compatible. Easy access tray negates need for caddies. 300KB per second transfer rate.

Popular CD titles included

- Just Grandma and Me
- Where in the World is Carmen San Diego
- Software Toolworks Encyclopedia
- The Animals (San Diego Zoo)
- Aldus Photostyler (CD16 only)

NETWORK SERVICES

As more and more companies computerise their operations with individual PCs, it becomes logical to somehow link up the investment they have made in hardware, software and peripherals so that these resources can be shared. The connection of PCs via cable is called a network. Each PC in the network requires a network card so that it can be connected to the network. A network operating system is the software to manage the sharing of files, application software, communication devices and printers.

PC Direct is a Novell Authorised Reseller and Microsoft Systems Integrator with qualified engineers to help you consider the alternatives and make recommendations about what will best suit your requirements. We can provide a complete range of networking products from high capacity file servers to mail systems and uninterruptible power supplies. PC Direct has the experience and proven support record of providing reliable, fully field tested and approved network solutions. We can provide full network setup, implementation and on-site network support (Auckland area). Network support for NetWare, Windows for Workgroups and Windows NT can be provided by our qualified engineers on a casual (hourly) or contract basis. For further information, or to discuss your network requirements call PC Direct Network Services.

DIRECT ORDER

Direct Order is a simple, safe and convenient way for you to order a computer system or any of the other products in this catalogue. Dial our toll-free number and talk to one of our friendly sales team for advice, product information or to place your order. Alternatively, you can fax or post your order to us. From that very first contact, a customer service rep will give you personal assistance and provide knowledgeable answers to any questions you may have. After entering your order, your rep will pass it to our skilled production engineers. This team individually configures each computer, installing software and

adding any peripherals you may have ordered. They have a personal quality responsibility for every system they build, so you can be sure you are in good hands. Following 24 hours of testing your system is ready for dispatch. Your customer service rep will keep you fully informed along the way. Feel free to discuss any special requirements you have with him or her. To allow our engineers to complete final testing and configuration of your order, please allow 48 hours from receipt of order before dispatch.

FREE DELIVERY

All orders are sent by overnight courier for quick delivery in the North or South Island. Any purchase over \$500 is delivered to you by overnight courier absolutely freight free! In all main

cities and towns your order will be delivered to your door. Outlying rural customers will have their order delivered to the nearest freight depot.

PAYMENT TERMS

Payment of your order must be received in full before dispatch. Alternatively, you can pay on collection if you are picking up your order from our Auckland showroom. As we use courier companies for delivery, we cannot arrange for payment on delivery. You can pay for your order by cheque, credit card or cash (please do not send cash in the mail).

PC Direct also offers hire purchase and lease to own options. For further details please call one of our sales consultants.
